

Drum Mowers ZETOR system 165/ 185

These proven drum mowers became very popular among professionals through the years due to their literally unmatched sturdiness and extremely long lasting, trouble-free and maintenance-free operation. Hundreds of thousands have been sold all around the world. Zetor system drum mowers in use for fifteen or twenty years are no exceptions.

Because of their mechanical robustness, these mowers can mow even the heaviest types of grasses and forage crops. At the same time, they can be operated at higher speeds so their productivity is much higher than anyone would expect from a 6 feet wide mower (see back page). As always with Zetor equipment, Zetor system 165/ 185 mowers represent more value for your money. In fact, their price-performance relation makes the Zetor system drum mowers a class of its own. Zetor mowers have been supported by full line of parts in Zetor warehouse in the U.S. for more than 25 years and carry 3-year parts and labor warranty.

The location of heavy blades on large diameter drums creates very high blade speed, efficiently cutting just about any type of grass or forage. The drums are precisely balanced for a smooth, vibration-free run.

Tough and heavy, long lasting, easy-to-replace wear discs are freewheeling at the bottom of the mower drums. The carefully selected suspension spring reduces down pressure.

Drums are driven by a heavy duty gearbox equipped with quiet bevel gears. Simple gearbox design with a minimum number of moving parts is one of the features that make this mower virtually maintenance-free. The gearbox is filled with grease, rather than oil, eliminating any chances of leaks and allowing the mower to work on slopes. The high location of the gearbox also protects it from mechanical damage.

Semi-automatic belt tensioning cuts maintenance time.

The breakaway safety system protects the mower when a drum hits an obstacle.

The metal hood resists abuse as well as heavy snow during winter storage. Metal rails around the safety curtain protect the most exposed areas of the curtain, extending its life considerably. Switching from working to transport position is effortless and does not use any hydraulic cylinder (tractor does not need hydraulic outlets).

Durable blades are reversible and twisted for a high quality cut and increased safety. Blades are mounted on large diameter pins and retained by a proven quick-release system for quick change.

Specifications:

	system 165	system 185
Width of Cut	5.5 ft	6.2 ft
Transport Width	52 in	52 in
Weight	1000 lbs	1060 lbs
No. of Drums	2	2
No. of Blades	6	6
PTO Speed	540	540
Peripheral Speed of Blades	254 Feet per Sec.	285 Feet per Sec.
Linkage Pins	Cat. I and II	Cat. I and II
Recommended Tractor Horsepower	40	40
Maximum tilt down during mowing	7 Degrees	7 Degrees
Maximum tilt up during mowing	30 Degrees	30 Degrees

Note: These mowers are not intended for roadside or municipal mowing. They are intended for agricultural use only.

Some people still think that Zetor drum mowers are too small for their jobs. We do not. Here is why:

ZETOR 185 DRUM MOWER

TYPICAL 8-FOOT DISC MOWER

Warranty: 3 years
Typical life: 10-15 years, virtually service-free

Warranty: 1 year
Typical life: 5-10 years

Zetor 185 and 165 drum mowers are so compact and sturdy that you can run them at higher speeds. Productivity is dramatically increased. All that for less than half the price of a disc mower. So, you do the same amount of work for a fraction of cost. No wonder that these drum mowers have been so popular for more than 30 years.
